Important Information About Your Medicare Part B Prescription Drugs

The Inflation Reduction Act (IRA) is a new prescription drug law that went into effect January 1, 2023. This law improves access to Medicare Part B drugs.

The IRA established that effective April 1, 2023 certain Medicare Part B drugs, for which Medicare has agreements with the manufacturers, may be subject to a lower in-network coinsurance than one established by MCS in your Evidence of Coverage, Annual Notice of Change, and Summary of Benefits.

The list of applicable Part B drugs, as well as the coinsurance for those drugs, could change each quarter as established by the Centers for Medicare and Medicaid Services, but will never be greater than the coinsurance specified in your Evidence of Coverage, Annual Notice of Change, and Summary of Benefits for 2023.

The IRA also establishes that effective July 1, 2023, the insulins furnished under Medicare Part B through an item of durable medical equipment, is subject to a beneficiary coinsurance or copayment cap for a month's supply that does not exceed \$35 and the Medicare Part B deductible does not apply.

Keep this notice as an addendum to your Plan documents for future reference of your benefit coverage.
